

“Take A Trip” Outline

By: Ximena Velasco

Overview: *This virtual reality, take your through a music festival, and as the video progresses your vision starts getting blurry due to the fact that the drugs you have consumed, in this case is Ecstasy has made your body temperature increase therefore you experience dehydration; this will be created by a video special effect creator. Another of the effects you will be going through is an LSD or Acid “trip”, this “trip will be created by the 3D Graphic Designer. As you experience this informational pop up will appear informing you on the drug that is causing whatever you are experiencing; this information will be researched by the researcher.*

Who I need?:

- 3D Graphic Designer: - *How long* : I need them as long as creating the animated “trips” would take to create. *How much do they get paid?* \$20-\$25
- Video Editor: *How long*: The majority of the course this project will take in order to put together the festival video and the 3D animation video clips. *How much do they get paid?* \$30- \$35
- Researcher: *How long?* 3-4 Days, enough time in order to research the negative effects of “festival popular drugs; LSD, Acid, and Molly/Ecstasy”. *How much do they get paid?* TBD ?? \$15-\$20
- Special Effects Technician - 3-4 Days. TBD based on how long it takes to create those special effects that will be applied over the regular video. *How much do they get paid?* \$69,560 annually
